

Teams design, construct and test a bridge to meet customer specifications whilst working within limited budgets, resource availability and timelines.

Working with limited budgets, resources and time frames, teams will work together to construct and design an impressive bridge. The bridge must be strong enough to allow a large remote controlled vehicle to safely cross it.

Bridging the Divide is a fun, engaging, hands on event with powerful metaphors- all departments of an organization strive towards their own objective but also play a vital role in the bigger picture of achieving organization goals.

Bridging the Divide
